The Committee recommend that Notice be served on the National Telephone Coy that the rent for Poles on the Councils premises in Dundalk, would be charged at 10/- per year from 1st Jany 1906.

Mr Jas Johnston moved, and Mr M. McEvoy seconded the following resolution -

"That we the Urban Council of Dundalk are strongly of opinion that the differences at present existing between Mr Healy M.P. for this division of Louth, and the leading Members of the Irish Parliamentary Party should be amicably arranged in view of the fact, that Mr Healy has never refused to take the pledge to sit, act, and vote with the Irish Parliamentary Party, and that he has publicly declared his willingness to sign the said pledge and abide by whatever condition his constituents may lay down; that in view also of the fact that Mr Laurence Waldron M.P. for one of the divisions of Dublin is adopted by the party, although he is not bound by the pledge, that Serjeant Dodd is the adopted Candidate of the United Irish League of North Tyrone, and that an arrangement has been come to with Mr William O'Brien and his followers; we fail to see why North Louth should be selected out of all Ireland for a conflict between Catholics and Nationalists whose angry passions will be excited, and the evil effects of the contest felt for many years.

That as Mr Healy has been a sturdy champion at all times of Catholic rights and has done yeoman service in the past for the sacred cause of religion and nationality, we would ask our eminent and reverend Parish Priest Cardinal Logue to intervene and by his personal influence endeavour to bring about an amicable settlement of this difference, and bring a message of peace to his loving and obedient Catholic subjects."

After some discussion thereon the resolution was recommended for adoption by the Council, Messrs Jas McEvoy, Bernard Finnegan, Peter Hughes, Patrick Hearey, John O'Connell, and Michael F. O'Neill dissenting on the grounds that it was not a matter for consideration by a Committee of the Council.

After the above Minutes were read a lengthened discussion took place as to the accuracy of Same

This meeting was held to consider a letter received from Dr Moynagh, the Councils Solr, relative to the case heard at last Q. Sessions on 23rd inst. Magrath v Curley & M^c Cann. The letter having been read and the matter fully considered, the Committee decided, that the Rates for the past year had been properly struck, but a technical mistake had been made in the signing of the Rate Book - the same rule having been followed for 52 years, whereby the Chairman, two Councillors, and the Town Clerk only signed the warrant, and as the Rate Collection for the year had practically closed, the Committee considered no respectable rate-payer would take advantage of the error now discovered for the first time.

Mr M^c Dowell whose land has to be entered for necessary works in connection with this Main, and in lieu of wayleave and compensation, wants a water-connection to his house, and a water supply free. The matter having been fully discussed - It was decided to put in the Water-connection free, and charge a nominal amount per 1000 gals by meter, for a domestic supply for his premises - the matter to be left in the hands of the Surveyor to arrange.

The following Report read from Committee re Sloblands, &c. which met on 11th inst.

Present - Messrs H. Deavy. B. Finnegan, Joseph Hamill, M. F. O'Neill, J. F. M.c Gahon & Surveyor.

The Committee inspected the ground and recommend - that the Surveyor prepare a Map of the Slobland on the South Side of River adjoining the Councils reclaimed land at St Helens, and extending from the end of the river wall at East end of Thigreen to the Greenore Rly Bridge, and that application be made to Lord Rodens Agent for a lease of same.

It was further unanimously recommended that a lease of the strip of land along side the Roadway at St Helens be procured from the London & North Western Rly Coy on the best terms that may be found possible, and same filled up at once, as the present condition of the place constitutes a serious nuisance, also that the South Western Corner of reclaimed land be fenced off and planted, the shrubs for same having been offered from private sources. Also we beg to point out the necessity of placing a lamp on St Helens Road for the use of the public frequenting the Quays.

Signed - J. F. M.c Gahon, J. Hamill, B. Finnegan, H. Deavy & M. F. O'Neill.

Special Meeting of Dundalk Urban District Council
Tuesday 4th December 1906.

Present - Bernard Hamill J.P. in the Chair.
Jas Gosling, John O'Connell, J.P. McGinity, J. F. McGahon, S. H. Moynagh, M. McCoy, H. Dearey, B. Finnegan, E. Johnston, Jas McCourt & M. F. O'Neill.

Thos Hamill, acting S.S. Officer, & Jas McArdle, Contractor, also attended.

The Town Clerk read the Circular convening the Meeting which was called to inquire into the placing of manure in a field in Hill Street, by the Contractor for South Ward.

The Town Clerk produced the regulations as to the removal of the Ashes and Refuse by the Contractors for the several Wards, which stated same should be deposited on the Stobland at St Helena, or other depot where directed by the Sanitary Sub-Officer, or other Official of the Council.

Thos Hamill, acting Sanitary Sub-Officer, when asked, admitted that he directed the Contractor to deposit the manure on Mr Gosling's field before, and after asking the Town Clerk's permission.

The Chairman having made a Statement as to where the manure should be deposited - asked Jas McArdle, the Contractor, what he thought the manure was worth - when he replied that there were about 200 loads, which he thought would be value for about £30.

This value placed on the manure was considered excessive, and it was generally considered that a third of the sum named by the Contractor, would be more like its value.

The matter having been fully inquired into - the Chairman asked who should pay for the manure deposited in Mr Gosling's field, to which there was no reply, none of the Councillors present considering that it was of any value, or that there was anything in it on which they could take action, and the Clerk was directed in future to see that the Orders of the Board be carried out, and if any departure from them was necessary to have it brought before the Board.

Meeting adjourned -

The deputation having laid their complaints before the Company, and having discussed the lighting question fully - the Gas Company submitted a new Lamp Head - which if adopted, they alleged would greatly improve the lighting of the Streets, and undertook to put up half a dozen of same at places arranged, so that the Council could see the effect. Further they undertook to put up 80 along the principal thoroughfares, if the Council approve of them, the Cost being £5 each, half of which they would ask the Council to pay by three yearly instalments of £20, the Lamp Heads to be the Property of the Council when last instalment paid.

A discussion took place on these minutes, Mr J. M. Johnson explained that he did not wish the Council to be bound by them regarding the purchase of the new Lampheads. Resolved,

"That we demand for the Children attending Irish National Schools Educational rights and privileges equal to those enjoyed by the Children attending similar Schools in England and Scotland. That we consider it a monstrous injustice to Ireland that the Parliamentary Grant for Irish Primary Education for the current year should be £578.905 less than the Scottish Grant, while the number of pupils to be educated in Primary Schools in these two countries is practically the same, being in the ratio of 1 for Ireland, and 1,09 for Scotland in 1905, while if the population be taken as basis - and this is the only basis which is fair to this country - Scotland gets 10/- per head this year, while Ireland only receives 7/6 per head from the ordinary estimates, and 3/- per head from the Development Grant.

That, in the interests of Irish Education we urgently ask an all round increase in the Salaries of Irish Teachers as we believe the present Starvation Salaries are calculated to prevent the entrance of suitable candidates to the teaching profession, as well as to drive away those who are already in, and that we see no reason whatever for denying to Irish Teachers those civil rights which are freely conceded to the Teachers of Great Britain."

1. Minutes of Meeting of Electric Lighting Committee held on 2nd August 1907, read as follows - Present Jas McCourt in the Chair, S. H. Moynagh, John O'Connell, H. Deasey, J. J. McGahon, & Peter Hughes.

Minutes & Report of Electric Lighting Committee read & approved -

This Committee Meeting was called to meet Mr Wilson of the firm of Messrs Miller and Wilson, Electrical Engineers, Liverpool, re the question of Electric Lighting for Dundalk. Mr Wilson having very fully discussed the question of Electric Lighting in Dundalk, and answered many queries as to same - the Committee decided to report to the Council on the matter -

The Report of the Committee was read as follows -

"To - The Chairman and Members of the Council.

Gentlemen.

We beg to report to you as follows - At a Committee Meeting of the whole Council held at the Town Hall on the 2nd day of August inst. there attended Messrs James McCourt (in the Chair), Henry Deasey, Peter Hughes, J. J. McGahon, John O'Connell, and S. H. Moynagh, with the Town Clerk and Surveyor, and Mr Wilson of the firm of Miller and Wilson, Liverpool, Electrical Engineers.

The Chairman called upon Mr Wilson to explain to the Committee the probabilities of the Council being able to successfully light the town by Electric light and the possibility of his being able to obtain a Contractor to undertake the lighting.

The Engineer then gave the Committee a lot of Statistics and proved to their satisfaction that the town could be lit in such a manner as to effect a large saving on the present system. In his opinion in order to light the town thoroughly a sum of £15.000 would be required, but in order to effect a saving by adopting a smaller scheme it could be done for about £10.000. The Council also discussed with him many matters as to plant, installation and wiring systems. However as the Engineers Estimate of the cost of lighting the town was based on a hurried and superficial examination of the town, and as he offered to inspect the town thoroughly in consultation with Mr Sellars and furnish to the Council detailed reports of alternative schemes for the putting up and installing an Electric lighting Station, the proper place for the erecting of a Power Station, the costs of same, and a comparison of the expenses of Electricity as compared with the price we are at present paying for gas for the sum of £15.15.0.

We recommend the Council to employ Messrs Miller and Wilson to make a thorough inspection of the town with a view of lighting it with Electricity, and to report to the Council fully thereon at a fee of £15.15.0, and to postpone taking any further steps in the matter until the report is received; the Engineers to be requested to take the work immediately.

Dated this 2nd day of August 1907. Signed James McCourt

The letter referred to this Committee by Mr Johnston, Solr, re Mr J.W. Brooks, having been read - Maguire the Carter in charge of the Watering Cart on the day of the alleged occurrence being in attendance, and having explained what occurred - the Committee decided no injury had been done to Mr Brooks' Clothes, or assault committed on the occasion, and exonerates the Carter from all blame.

To, The Chairman and Members of the Dundalk Urban Council.

Dear Sirs,

On behalf of my father who is at present unable to reply personally - I beg to acknowledge receipt of your resolution of the 23rd inst, and to thank you most sincerely for the kind references and good wishes contained therein.

The generosity of heart which prompted this tribute of esteem, is but another proof of the good relations that have always existed between the members of your Council and my father, both as a private member and as Chairman.

I know that if sincere good wishes and a true hearty welcome could restore health, that he would soon be able to take his place once more amongst you. But he has been ordered complete rest from all work and worry, and I can assure you gentlemen that the business of the town does not at present cause him the slightest uneasiness, nor need it do so, while it is conducted by the able Board at present in Office.

More especially do I thank you now, one and all, for the cordial assistance which you invariably extended to him during his three years occupancy of the Chair, and without which

all his efforts would have been of no avail.

I also wish to thank your able Staff especially Mr Comerford, and Mr Sellers, for their unstinted assistance on all occasions and for the pains they took to make his duties as light as possible, and with whom he always found it a pleasant duty to co-operate.

I avail myself of this opportunity to thank, through you their representatives, the people of Dundalk for the whole hearted and unselfish support which they so frequently and so consistently gave him at the polling booths, and for their generous and ~~unhesitating~~ unhesitating ratification of his public actions during his tenure of Office.

I am, Dear Sirs
Yours Sincerely
Patrick O'Connell.

John O'Connell. & J. F. McGinity.

Minutes of last Meeting read and signed.

Minutes of Committee Meeting of the Council held on 21st July inst. read as follows - Present - Jas McCourt D.P. Chairman, Joseph Hamill. M. McEvoy. B. Finnegan and John O'Connell. This Meeting was called to considered the question of Electric Lighting, &c, A reply not having been received from Mr MacMahon on this matter. it was allowed to stand over until same received. A letter was read from the Great Northern Railway Company relative to the Council's letter sent on 24th April last, asking them to do something to prevent accidents at the Entrance Road to the new Station by altering the footpath to the near side.

The Company now ask the Council to Asphalt or Concrete the footpath leading to the Station, and if so they would put up a post 6 feet from the corner of the Wall turning from the public road into the Station yard with an open gate or railing between it, and the existing post, so that parties coming into the Station would have a view of anything leaving the Station yard. The Committee considered this offer of the Company entirely insufficient to meet the danger existing at this spot, and while they ask the Council to do work which would cost over £100, they only offer to work themselves that would cost not more than £10 or £20, to provide against a serious danger, and which would be of very little use.

The Committee recommend that a deputation of the Directors be asked to meet a Committee of the Council on the ground at Dundalk to investigate the matter, and that no expenditure be made on the footpath until something definite was done by the Great Northern Railway Company to remove the danger existing at this place.

Letter read from the Rt Hon J. W. Russell's Secty. fixing Thursday 30th inst. at Eleven o'clock a.m. to receive the deputation re Grant for Technical Education, &c, which was approved, and the Town Clerk directed to attend to the matter.

Surveyor tabled Plans for a Motor Garage and Workshop to be built in Bachelors Walk for Mr D. Leavy - No Sanitary Convenience is shown though drainage is mentioned. Provided the frontage line when laid down is worked to, and Sanitary accommodation provided he recommended the plans be passed. Mr McGahon stated the Committee who inspected the place after consulting the Surveyor decided to offer him £5 to set back the line of his new building, so as to straighten the line of the present frontage on the east side and going back two feet at the side next Clanbrassil Street.

It was decided to offer him this sum, and if he refused it, that he be compelled to build

on the present line of frontage - The Committees recommendations were unanimously adopted.

Water Inspectors Report read and approved.

Sanitary Reports — Dr. Flood, Medical Officer of Health reported as follows.

1. That a case of Typhoid Fever - Mary Clarke aged 16 years, was removed from Castletown Road to Hospital on 22nd inst, and he had the premises, Clothing, &c were disinfected as usual.

These people sell Milk of one Cow; and the father of the Patient promised me that, for at least one month, he would dispose of any milk he had from Sterilized vessels, before bringing it to the house, the cow living on grass.

Approved.

2. Dr. Flood, further reported that in accordance with instructions received he inspected on the 24th inst (for the second time) premises in Church St, occupied by Mr Kearney & Son.

The yard is very large 364 feet long, and is divided into two portions, which are connected by a gateway under a Corn Store built across the yard. The lower portion which is as large as a small field, is not drained, and contains two piggeries concreted and fairly clean, with 20 young pigs. There is also a large heap of manure. In the next part of the yard there is 1 piggery concreted and well drained containing five young pigs. It is well over the distances prescribed by the bye-laws from any dwelling being 80 ords feet. The other piggeries and manure are 200 feet from any dwelling. He does not consider the place in a dangerous state from a Sanitary point of view, though the lower yard requires draining and removal of Manure heap. There are some ruins of outhouses, or Stores in the next portion of yard, supported by wooden props; and as they appear to be in danger of falling, he advises the Sanitary Authority to have a report from Mr Sellars on same.

With regard to the Statement that "fever has been rampant all the winter in this end of the town, consequent on the noisesome and putrid manure heaps from piggeries," He says that every case of fever which occurred in this district was immediately reported to the Sanitary Authority and to the Local Govt Board, and that there has not been a single case in this block of buildings for some years.

The parties concerned have a dispute about the possession of the lower part of the yard, and this fact may possibly throw some light on the complaint made to the Local Government Board."

He understands that the dispute in question is the reason why the Keaneys have not drained the lower yard.

Ordered on the reading of this report - That a copy of same be sent to the Local Government Board.

3. Dr. Flood further reports that premises in Nicholas Street John Cassidy and Mrs Walsh are in an insanitary State and badly ventilated, and recommends privy and Ashpit to be cleansed, and a Window on side hinges, &c. be substituted for the present one so as to allow of freer ventilation, and in Mrs Walsh's house the drain to be re-set to prevent escape of Sewer gas.

4. Dr. Flood, further reports on premises in Camp Street occupied by Matthew Warren and Pat Markey, in which there are Cesspits dug out of the earth, and containing accumulation of Manure and decaying vegetables which give off an offensive smell - and recommends that the pits be cleansed and proper Ashpits erected.

5. Dr. Flood further reports that premises in Church St, occupied by Thos Cassidy which has a very small yard also in a very insanitary state, from the WC being out of order,

Sanitary Reports Cont — Kitchen much below level of graveyard at back and consequently damp - Range smokes, and other defects, and recommends - That that the yard be tiled, W.C. and range made perfect, and if by drainage on Graveyard side and cementing the back wall be made good, the house could be made tolerable habitable.

6. Dr. Flood further reports on 16 houses in Mascwell's Terraces on Newry and Forthill roads, all of which are drained into a Common open drain at the rear, which runs down to the river - This drain is so uneven and filthy that it is nothing better than an elongated open Cesspool; and the Stench from it is a nuisance dangerous to health. He recommends that this drain should be cleansed immediately; and it would be well to have the advice of Mr Sellars, with a view of getting the area drained more efficiently, and thus prevent a recurrence of the nuisance.

Ordered - That Notices be served on the Several Owners in the last four cases to have the Medical Officers recommendations carried out.

Thomas Hamill - Acting Sanitary Sub-Officer (pro tem) - reported as follows.

That he visited 22 Laneways in town since last Meeting, and seen them regularly cleansed by the Contractors. That there were 43 Ashpits and 40 Ashbins cleansed in the several Wards during the period.

That he had the premises in Castletown Road occupied by Michael Clarke disinfected on 24th inst. by directions of the Medical Officer of Health. Also the Clothes necessary were sent for disinfection - Articles destroyed 1 flock Mattress, 1 Straw Palliasse, 2 Flock Bolsters, all of which were replaced.

That he visited the following premises since last Meeting, and found them all in fair order, viz -

6 Houses in Nicholas St, 10 houses in Camp Street, 6 houses in John St. 5 houses in Daly's Lane, 12 in Casey's Row, 14 in Casey's Place, 23 in Williamson's Place, and 10 in Lisdoo, - in all 86 houses.

That he served Sanitary Notices on Mr Kincart, Mrs W.V. Dowdall, and Mrs Fleming, and Noticed parties in Earl St. to have their Ashpits Cleansed.

That he received several reports as to Ashpits not having been attended to by the Contractors, and that he begged to report, that they were not able to cope with the work.

Approved - Ordered - That the Contractors be cautioned that unless they attend more regularly to the Cleansing of Ashpits, &c. that the Sanitary Authority would consider the question of serving them with Notice to break the Contracts.

Letter read from Mr C.J. McGahon - re Notice served on Mrs Fleming as to Sanitary defects in house in Barrack St. occupied by Jas Keeley, her property - No action to be taken on Notice served for the present.

Letter read from Mr P. J. Lane, Town Clerk, Fermoy, enclosing the following resolution which was unanimously adopted on the Motion of Mr J. F. McGahon, Vice Chairman, seconded by Mr B. Hamlet J.P. Resolved -

"That we hereby earnestly urge the Irish Members of Parliament to oppose the Clause of the Local Government (Amendment) Bill now before the House of Commons, which seeks to validate the Public Bodies Order made by the Local Government Board in 1904 in excess of their powers."

We consider that an Order dealing with so many interests could not be made applicable to the varying circumstances of the several districts of Ireland; that the order, if put into operation, would be wholly unworkable, as has been found to be the case, where an attempt to carry it out has been made, and would entail heavy expenses on the several public Boards; and moreover that it would replace a system, that has worked admirably during the past fifty years, particularly with the Assessment and Collecting of Rates, and the Keeping of accounts and records.

We are further of opinion that the Order is opposed to the letter and spirit of the Local Government Act of 1898, in that it seeks to transfer to the Local Government Board many of the powers conferred on the Urban Councils by that Act, and this without consultation with, or reference to any of the Representative Bodies interested; and would in effect amount to a repeal of many of the principal provisions of the Act of 1898, and the other Acts under which the Public Bodies derive their powers."

The Town Clerk was directed to send Copies of this resolution to the Members of Parliament for North and South Louth, and the Chairman of the Irish Parliamentary Party.

I would respectfully suggest to your Council to have a number of leaflets printed, showing the principal requirements of the Order. These could be distributed amongst the dairy owners, who would then be in a better position of knowing exactly what is required of them.

There is a pool of Stagnant water containing decaying vegetable matter, and several heaps of Stable manure all over the plot - and recommends that it be cleansed, all manure removed, the site of the pool of water filled in, and pavelled.

Minutes of Special Meeting of the Dundalk Urban District Council
Monday 17th. May 1909.

Present – James McCourt J.P. Chairman,
J. W. Johnson, B. Hamill J.P. E. Goodman,
J.P. Mc Ginity, John Norton, John O'Connell, B.
Finnegan, Joseph Hamill, J. H. Monaghan, C.J.
McGahon, Peter Hughes, T. Connick & B. McGuinness.

The Town Clerk read the Circular convening the Meeting, which was called to adopt the Reports of the Committee on the Electric Lighting Scheme, which were submitted, and read at the Council Meeting on the 11th inst, &c.

The Town Clerk then read the following report.

"In Sept. 1907, the Urban Council employed Messrs Miller, Wilson and Pegg, Consulting Electrical Engineers, to make an inspection of the town and furnish a report on the prospects of a Scheme of Electric Lighting. This report was furnished and considered at a Special Meeting of the Council. The financial prospects of the undertaking, as a probable commercial success, being considered satisfactory, steps were accordingly taken to secure the necessary borrowing powers, which was done on application to Parliament.

Subsequently the Council employed Mr Herbert J. Staves C.E. of Dublin to furnish an alternative Scheme which was received in due course, and which strengthened the opinion entertained by the Council as to the commercial prospects of the undertaking.

In addition Messrs Wilkins and Burdon, Consulting Electrical Engineers, Dublin, furnished the Council with a Scheme in outline, and undertook, if employed to carry out same to make the undertaking a paying one within a period of not more than two years.

The Schemes may be briefly outlined as under :-

Scheme A provided for a Suction Gas driven plant, comprising two 75 K.W. sets, and one 100 K.W set, at a total cost for Power Station of £7510; with £8.600 for Mains (underground in main Streets and overhead in lesser thoroughfares), and 39 Arc, and 400 Incandescent lamps. This Scheme was subsequently amended by the elimination of open arc lamps and the provision of the new Metallic filament incandescent lamps for the bulk of the Street lighting, with flame arc lamps in the central portion of the town. Instead of the plant originally suggested three 75 K.W sets were now proposed. The adoption of these amendments reduced the total estimate for plant, mains and lamps from £16.110 to £14.653. The framers of this Scheme originally suggested the Fairgreen as site of Generating Station, but subsequently on the Grammar School Garden being offered as a site, adopted the latter as more central and suitable.

Scheme B. recommended the adoption of Steam power, rather than Suction gas engines, and the use of metallic filament incandescent lamps rather than arc lamps with the generating station on the Grammar School Garden site. The estimate for the generating station under this Scheme was £8.410, including the necessary buildings, and £7.000 for mains, lamps, posts, &c, or a total of about £16.000

£16.000, allowing for contingencies.

Scheme C recommended gas-driven-sets, two 125 K.W sets with two 200 h.p suction gas plants, overhead wires of a total length of 13 miles, with 2 miles of distributing cables laid under footpaths and roadways, 186 lamps of 32 c.p, 70 of 50 c.p, 3 of 100 c.p, and one of 200 c.p all to replace gas lamps of less illuminating power. The total cost of this Scheme was set down at £13.991.

The Council having carefully considered all three Schemes took into consultation several gentlemen eminent in the Electrical world, who met the Committee in conference on several occasions, and very kindly digested the several proposals and gave the Committee the benefit of their advice thereon. The communications received from these gentlemen being of a confidential character their nature cannot be here set down in detail, but it may be mentioned that they supported the view that the Electric lighting undertaking would under efficient management be made to pay. They recommended generally the adoption of the Suction-gas power plant and the use of metallic filament incandescent lamps, and the use of overhead mains generally on the plan now familiar in many cities.

Finally the Council decided to refer the Schemes to the arbitrament of Sir A.B.W. Kennedy one of the most eminent Consulting Electrical Engineers. His partner Mr Jenkin, visited Dundalk, inspected the proposed site, and went over the area proposed to be lighted.

Sir A.B.W. Kennedy examined the three Schemes submitted to him, and in a very full report criticised them in detail. He came to the following Conclusions :—

Scheme B– "The whole system is exceedingly complicated and uneconomical, and one that I cannot possibly advise your Council to adopt."

Scheme C–, "Does not appear to be the result of a very careful consideration of the facts of your case – Would not enable you to take advantage of Metallic filament lamps of the lower candle powers, which are exactly the type of lamp that will be most in request in Dundalk. The making of a profit in the first year, on which the Scheme lays great stress is by no means an ideal to be aimed at. What you require is a system laid down in a substantial manner, and so arranged that it can be extended on its original lines as required. If you were to place the earning of a profit at once before everything else, it would mean that the work would have to be done initially with regard only to cheapness. The Scheme so far as it indicates what is intended, is in itself unsuitable."

Scheme A–. "I have no hesitation in saying that the System described and estimated in the second report of February 12th. 1909, appears to me obviously the right one at the present time in Dundalk. It will enable metallic filament lamps down to 16 c.p to be used both for Street lighting and for any of your customers. It enables the current to be generated and distributed in an economical manner. In a small Station such as yours very great importance is to be attached to simplicity in the System adopted."

Sir A.B.W. Kennedy considered that it would be well to make a somewhat more generous estimate for buildings, roadways, &c. making the total Capital Cost of the installation to £15.000, and allowing for the expenses of the Order, Engineering fees, &c. the total capital charges might be set down at £17.000.

Finally Sir A.B.W. Kennedy expressed the opinion that the Council would be quite safe in acting on the advice of Messrs Miller, Wilson and Pegg, the framers of Scheme A. and that

that this firm would make a through success of the Dundalk Electric Light undertaking.

The Committee recommend that the Council adopt Messrs Miller, Wilson and Peggs Scheme, as approved by Sir W.H. Kennedy, and subject to the suggestions in the latters report, for the installation of Electric Lighting Plant on the terms mentioned in their letter of 3rd August 1908, and that an Agreement be prepared by our Solicitor binding them to carry out the Scheme accordingly.

Signed, James McCourt. Chairman
Thos F. McGahon. Vice-Chairman
Bernard Hamill
Peter Hughes
Stephen St. Mopnagh
Bernard Finnegan

Mathew Comerford. Town Clerk
Maurice Sellars. Town Surveyor.
Dated 11th May 1909.

Mr Goodman proposed and Mr J.M. Johnson seconded the adoption of the Committees report.

The Chairman having asked was there any amendment -

Mr C.J. McGahon stated he was not satisfied that the Council had thought out the matter sufficiently, and moved that the Council do not adopt the report.

No one seconded Mr McGahons amendment.

Mr B. Hamill replied that the matter had been fully thought out, and got every consideration by the Council for a long period.

The Chairman added that the matter had been now before the Council for 12 years, so that no one could say the matter was rushed.

The Chairman then declared the report adopted, and Messrs Miller, Wilson, and Peggs Scheme formally approved.

The Town Clerk was directed to instruct Messrs Miller Wilson and Pegg to prepare the Plans, Specification and Estimate for the carrying out of the Electric Lighting of the town, when the Agreement embodying their terms for same, is perfected by our Solicitor.

The Town Clerk then read the following list of Loans to be applied for, which was formally adopted - on the motion of Mr B. Hamill seconded by Mr Peter Hughes, and an Inquiry to be held as soon as the Plans, &c. are ready, viz -

For the Electric Lighting Scheme as approved -	£20.000.

Surveyor's Report read and approved.

The following Report was read from the Surveyor on the Improvement Scheme for Defender's Row and Market Street.

Town Surveyor's Office, May 25th 1909.

Report on Defender's Row & Market St Improvement Scheme.

To the Local Authority of the Urban District of Dundalk.

Gentlemen,

"I beg to report that I have, in Compliance with your directions, inspected the nine Cottages in Defender's Row and the nine Cottages in Market St, the properties of Miss Kirkland, and Messrs Hughes, Murphy, Hughes & Haughey, referred to in the representation of Dr Flood M.O. D.P.St., and I have to say that the Cottages referred to are very old and obstruct the proper ventilation of the Street or Lane known as Defender's Row, in which they stand, and render the area around them congested and unhealthy, which it would not be if the ventilation of the Row were improved by knocking down these Cottages and adding the site on which they stand to the width of the Row. There are 8 inhabited Cottages standing at the Roden Place end of the Row, and 9 inhabited Cottages standing at the Market Street end which are very substantially deprived of ventilation owing to the obstruction caused by the Cottages referred to in Dr Flood's report. These Cottages at one point actually reduce the width of the laneway to about 3½ feet, and that being so the free ventilation of air is obstructed by them and the whole area made insanitary and unhealthy.

I have estimated approximately the cost of pulling down these Cottages and acquiring the land on which they stand and in my opinion the cost would be £355. 0. 0.

There is a good sized garden which goes with Miss Kirkland's property and, as this garden adjoins the yard at rear of the Town Hall in which the weekly Pork Market is held, and in which broken Stones and other necessary Stores required by the Council, their Road Rolling plant and Stone breaker are stored and worked, it could be added to the yard and increase the space thereof, which is badly needed.

By opening up Defender's Row in the way suggested a fine roadway for public traffic and vehicles of every description will be provided, and a necessary additional roadway leading to the centre of the town will be secured to the public; an additional width will be given to part of Market Street and Crowe Street, which is always very much congested on Market days, will be relieved to a very large extent of that congestion which at the present moment is almost an obstruction to the transaction of business on these days."

On the motion of Mr B. Hamill seconded by Mr J. F. McGahon the foregoing report was unanimously adopted, and the matter left in the hands of the Solicitor to the Council, the Surveyor and Town Clerk to have same carried out.

Water and Lamps Inspectors Reports read and approved.

Town Clerk to invite Tenders for the Lighting, Painting & Glazing of the Public Lamps for ensuing year, for next meeting.

Oct 29th. 1909.

Dear Sir. I wish you would convey to Mr Bernard Hamill, and the members of the District Council my appreciation of their great kindness to me on the occasion of my appointment to the National University.

Dundalk has always been in the forefront of the fight for National advancement, and I would be very unworthy of the confidence that my townspeople have always shown in me, if I had not laboured in the same good cause. I have tried to deserve their confidence, and their action of the 26th inst. is more than a fitting recompense for any endeavours of mine. I do indeed wish to thank them most heartily for their vote of trust on an occasion which makes their goodness doubly gratifying to me.

Yours faithfully
John S. McArdle.

The Town Clerk.

Surveyor submitted Plans lodged for the building of 5 Houses in Castleton Road for Mr Joseph Parks, which were approved.

Lamps and Water Inspectors reports read and approved.

Sanitary Reports

Dr. E. F. Flood - Medical Officer of Health reported as follows -

1. That his attention was called by the S.I. Officer to the manner in which the lodging-houses in Church Lane are Kept. Nearly every tramp who comes to the town seems to lodge there, and they are being sent in two and three to the Workhouse Hospital every day. The last time attention was drawn to this over 20 lodgers of both Sexes were counted in a house consisting of a Kitchen and three small rooms. The Street is a fine open one, the houses are fairly good, many respectable people live in it, and it is a thoroughfare joining some of the most respectable Streets of the town. It is too bad to have it infested with all kinds of tramps because one or two low lodging-houses are not properly looked after, and the owners not prosecuted.

Ordered. That the Sanitary Sub-Officer visit this Area weekly.

2. That he inspected the Passage in Francis Street leading to rear of premises on East side of Earl Street. The Ashpit is overflowing, and the surface covered with a large quantity of old paper and rubbish, it is also flooded and impassable, and he recommends -

That the Ashpit and Passage be cleansed, the Surface made even, so that the Storm water will drain off it, and the drain attended to if necessary.

Ordered - That the Occupiers be served with Notice to have this work attended to

3. That he inspected the Open Space adjoining the Demesne, and opened into by Jackson's Yard, Sheils' Yard, John Street, and Casey's Court. It is strewn over with rubbish of all kinds from old rags and bones to broken tins and bottles, and contains several unprotected manure heaps. The liquid parts of which are washed over the Surface in wet weather, the area is not drained - and recommends. That the manure heaps be removed, and the place cleansed.

Ordered - That the S.I. Officer call on the Owners of this place to remove the heaps of Manure, and put same in order.

4. That he inspected the Houses in Parks' Yard which have been condemned long ago, they are nothing improved, there are two trough Closets which are in a most filthy condition, and there is an unprotected manure heap, portions of which are strewn about the lower portion of the yard. He recommends. That the Closets be thoroughly cleansed, manure heap removed, and a general Cleansing of the Area.

Ordered - That Notice be served on the Owner to have the Medical Officer's recommendations carried out.

5. That his attention having been directed by the S.I. Officer to Sheils' Yard - he inspected same this day. The area is only half drained and the dwellings have been condemned years ago as being unfit for human habitation. The end of yard and trough closets are filthy.

He recommends general cleansing of the area. Most of the premises have been unoccupied for some time, and as there are many small houses in the town vacant - he did not think it would inflict any hardship on the inhabitants of the few occupied ones to close up the area as soon as possible. The Houses are of the back-to-back variety and therefore without ventilation or yards.

Ordered - That this area be closed, and the necessary Notices served on the Owners, and any other proceedings necessary instituted to have same carried out.

6. Dr. Flood. M.O.H. also reported that his attention having been directed by the S.I. Officer to Feehan's Yard - he inspected same this day.

Exactly the same remarks and same recommendations which he had made for Sheilds' Yard apply to this area.

Ordered - That this area be closed, and the necessary Notices served on the Owners, and any other proceedings necessary instituted to have this Order carried out.

John P. Hamill, Sanitary Sub-Officer reported as follows -

All the Laneways in North, South, Middle & Seatown Wards were ~~closed~~ Cleansed regularly 2 & 3 times weekly - the Privies and Ashpits emptied and limed and disinfected since last Meeting.

He also reported 1 Case of "Scarlatina" which occured in Stapleton Place, and 1 Case of Erysipelas in Market Street, and he had the usual disinfection carried out, and some clothing destroyed and replaced.

That he visited 7 Slaughter houses in town, and drew the M.O.H. attention to same, also to some other premises in Parks in an insanitary State.

That there were 41 Ashpits and 6 Ashbins cleansed and Stuff removed during the period.

Approved.

It was Ordered - "That the Sanitary Sub-Officer be empowered to prosecute any of the Slaughter-house Owners, when manure heaps are not removed, after two days Notice served to that effect."

Applications to register Dairies submitted and approved.

Letter read from the Secty of the Board of Trade relative to the New Branch Line of the Great Northern Rly crossing the Council's Road at Point Road, asking particulars as to the level Crossing, &c. - Referred to the Town Clerk and Surveyor to reply to.

Letter read from Dr. Moynagh to the Surveyor, returning his report thereon. - Referred to the Committee to meet the Great Northern Railway Directors thereon.

Letter read from same, enclosing the Agreement between the Council and the Dundalk Rural Council for a supply of Water to the Fountain at Red Barns - requesting that same be Sealed - Ordered - That the Corporate Seal be affixed thereto.

Letter read from same with the Conveyance of the House and Garden in Seatown from Miss Anne Kernaghan to the Council, asking that same be Sealed with the Seal of the Council - Ordered - That the Corporate Seal be affixed thereto, and that a Paying Order for the sum of Fifteen Pounds, the Purchase money for same be issued.

Surveyor's Report read and approved.

Water and Lamp Inspectors Reports read and approved.

Sanitary Reports - John P. Hamill. S.S. Officer, reported as follows.

That there were 88 ashpits cleansed and stuff removed since last Meeting, and the Laneways throughout the town regularly Cleansed.

That he had the Medical Officer's attention drawn to some houses in Anne St that are not connected with the Main Sewer.

That there were two cases of Infectious Disease occurred, in which the usual disinfection was carried out, viz - Miss Mc Ardle of Dublin St. Consumption, and Mrs Jane Reid of Seatown, Fever.

The S.O. recommended the purchase of a handy Spring Cart, to take Clothes to the Union for disinfection - Referred to next Works Committee.

Approved.

Dr. Flood, M.O.H. reported as follows -

That there are 13 premises on the North Side of Seatown, including Dwellings on West Side of entrance to St Patrick's Terrace, and 12 others on the East Side of entrance, not drained. There is also an absence of proper Sanitary arrangements. and recommends - That these premises be properly drained into the Seatown Sewer.

No order made on this report.

Dr. Flood also reported that he inspected the premises in John St, and adjoining Mrs O'Hagan's premises in Bridge Street - the date of inspection was 1st April inst - the weather was fine, and as time had been freely used, there was no cause of Complaint.

It is plain that Mr. Guinness' yard must be at times a nuisance. The five houses in John Street have this yard in Common, and there are four double common privies without cementing, placed along the wall separating the yard from O'Hagans. The intervals between these privies are taken up by large Ashpits, which would accommodate 30 or 40 houses instead of five. Two of these double privies abut on Mrs O'Hagan's Sitting room behind Shop and Kitchen. One of the drain traps is also out of order in Mr. Guinness' yard and requires resetting and paving around.

He recommends that the two double privies (4 in all) nearest Bridge St be abolished, and the Ashpits adjoining them: and that Mr Mc Guinness if he is to continue the other two double privies, cement them on his own side, so as to prevent oozing through the wall; or, better still erect water-closets. The traps should be repaired so as to prevent Sewer gas evacuations.

Ordered - That notice be served on the Owner to have the Medical Officer's recommendations carried out, and that this report be sent to the Local Govt Board when returning Mrs O'Hagan's letter.

Estimate of Town Rates.

Proposed by Mr B. Hamill, seconded by Mr Jas Gosling - And resolved -

Proposed by Mr B. Hamill, seconded by Mr Jas Gosling - And resolved -

That the Clerk be directed forthwith to publish Notice of Intention of the Council to make Rates in accordance with said Estimate in manner by law required.

On the motion of Mr J. F. McGahon seconded by Mr J. H. Mogragh - the following were elected Members of the Joint Burial Board for the ensuing year -

Joint Burial Board.

Ex-Officio Members - Jas Mc Court J.P. B. Hamill J.P. M. McCoy, B. Finnegan, E. Goodman. J.P. Mc Ginity and B. Mc Guinness. 7.

Elective Members - Rev C. Mc Donald Rev Fr Lyons, Rev R.S.G. Hamilton, Wm M. Patterson J.P. John Coe, Wm Tempest J.P. & Jas Norton J.P.

On a discussion as to the footpath from Mr Rice's at Lisboo to the New Cemetery, Town Clerk was directed to write to the Clerk of the Rural District Council asking him to call a Meeting of his Committee to meet a Committee of this Council at an early date in the Town Hall with reference to this matter.

The Estimate of Mr James Wynne, Builder, for taking down Wall at the Council's houses in Seatown and rebuilding same, at £19.10.0, was unanimously accepted.

Dr. Mogragh's letter was read enclosing Certificate of Taxed costs, dated 25th April 1910, amounting to £146.6.3, and payment ordered.

Water Inspectors report do

The following report was read from the Committee appointed to visit Dublin re purchase of a Fire Engine.

14th June 1910.

We the Committee appointed to visit Dublin and inquire into the question of providing a suitable Fire Engine for the Urban District, beg to report, that having interviewed Capt Purcell, and the Chairman of the Waterworks Committee of the Dublin Corporation on the 2nd inst, and having seen the exhibition kindly given by Capt Purcell of the various Fire Extinguishing Appliances, we unanimously recommend a Petrol Motor Fire Engine, built on the lines of the Dublin Fire Engine, as the best Engine for Dundalk.

The Engine shown to us at Dublin would in our opinion be too large for this district, but we believe a smaller engine of this class, can be turned out to meet our requirements and costing considerably less money.

Signed. James McCourt, Bern'd Hamill, J. McJohnson.

Reported that as requested by the Executive Sanitary Officer he again inspected premises in John St. about which he recently reported - That his recommendations have not been carried out fully, and the large Ashpits and number of Closets remain. The cementing is not properly done - in one of the closets for instance, it is cemented over the seat, while there is no cement underneath where it is required.

After a discussion on this report - A Copy of same was directed to be served on the Owner, to have the Medical Officer recommendations in former report carried out within a week.

2. Dr Flood also reported that the S.I. Officer had reported some Slaughter houses in the town as being insanitary. The M.O.H. states - It is impossible to put some of them into a Sanitary condition, and that they cannot be closed until the Sanitary Authority provide other accommodation for the butchers. The Public Slaughter house is as bad as any of them, and there is sickness in most of the families living in close proximity to it. That he is reporting for many years on this crying nuisance.

A dog was there as usual in the Slaughter house when he visited it a few days ago, but no prosecution.

On the reading of this report - It was stated by the Executive Sanitary Officer, that only two or three small butchers were using this Slaughter house now, and the S.I. Officer was directed to visit the place regularly and see that it is limewashed regularly and kept Clean, and that if he finds a dog there, a prosecution to issue against the Owner.

3. Dr Flood reported a case of Typhus Fever which occurred in Mary Street on the 5th inst - Mrs Seanlon, aged 36 years - Patient removed to Hospital and premises disinfected. Cause of disease unknown.

4. Dr Flood also reported a case of Diphtheria - Mary Davidson aged 16 years. which occurred in Market St on the 8th inst, Patient removed to Hospital, and premises &c disinfected. No infection traced.

John Callan, John Norton, J. O'Rourke, P. Deevy, T. Gosling, Peter Hughes & C. J. McGahon. Medical

The Committee took up the consideration of the Local Government Inspector's Report.

Mr Moynagh proposed and Mr Goodman seconded that the Schools of the Town be closed for one month. Dr Sellars who was in attendance stated he did not consider it necessary to do so, as most of the children suffering from Diphtheria were under School going age, but if the Committee considered it advisable he would not be against it.

The proposition to close the Schools was ultimately passed unanimously.

As to the recommendation in the report relative to the Convalescent Hospital at the Point - it was unanimously adopted, and the Committee decided to ask the Guardians to deal with the matter.

As to the Main outfall Sewer at St Helens. The Surveyor stated he inspected the several outlets on the Sewers with Dr O'Brien, and said the only remedy to improve them is an expensive one by septic tanks and a pumping Station, which the Committee would not take on with present. He also explained the different means of flushing the Sewers, which are regularly attended to, some of which have automatic flushing apparatus.

The Surveyor to alter the Flap Valve at the Embankment outlet as suggested, and other matters to be discussed at next Sanitary Meeting.

As to the providing of Ashbins instead of Ashpits. The Town Clerk & Surveyor referred to the use being made of them at present in the Councils houses, which is contrary to that intended. and the Committee are in favour of Small bins being provided, an estimate of the cost to be ascertained and submitted by the Surveyor.

The question of Privies and Earth Closets in small houses in town was considered, and it was decided to have them changed in every house to Water Closets - where possible, on the recommendation of the Medical Officers of Health.

The Committee recommend that a Portable Sprayer be provided for disinfecting in Fever Cases instead of the present one in use.

The Committee recommend that Section 45 of the Public Health Acts Amendment Act 1907 be adopted, and to be declared to be in force in the Urban District of Dundalk.

That all house drains of New Houses be fully tested before being occupied as the Report recommends from this date.

As to providing a Disinfecting Apparatus for the Urban District. It was decided to take no steps in this matter for the present as the cost would be exceptionally high, and the present arrangement of getting the Clothing, &c. disinfected at the Workhouse Steam Disinfector is sufficient, for which the Council contribute annually.

The Town Clerk read the Circular convening the Meeting which was called to consider the expediency of assisting the Great Northern Railway Company (Ireland) in the promotion of their Bill in Parliament by our Chairman appearing before the Committee of the House of Lords and giving evidence in favour of the said Bill, as passed by the House of Commons Committee, providing for the extension of the Company's line to the Quays at Dundalk, and the construction of one or two additional Quays.

After the matter had been discussed - On the motion of Mr J. W. Johnson, seconded by Mr Chas J. McGahon, the following resolution was unanimously adopted -

Resolved - That in the judgment of this Council the Dundalk Urban District Council of the Urban District of Dundalk in the County of Louth, Ireland, - it is expedient for the Council to assist the promotion of the Great Northern Railway Bill now before the Committee of the House of Lords inasmuch as the passing of the said Bill into law will promote the interests of the Dundalk Harbour Trust, with which our Urban District is intimately and closely connected, by extending the railway to the quays, thus expediting and decreasing the costs of transit over water, and by constructing additional quays so badly required in the Harbour, the present Quays being antiquated and the berths at some of them unsafe and shallow, especially the Railway Quay, and increased quayage accommodation being badly wanted, and this Council requests our Chairman, Vice-Chairman and Town Clerk to attend before the said Lords Committee on the 14th day of March next, or on such other day or days as the said Bill shall be before their Lordships Committee to give evidence for and on behalf and in the name of the Council in support of the Bill, and to urge that no alterations should be made in the Bill as approved by the House of Commons so far as regards the proposed Works at Dundalk, and the consent of the Council is hereby given to the assistance of the promoters of the Bill

Reports of Committee The following Reports read from Committee of the Seatown Ward -

Re Barrack St. and Quay St Crossings -

We visited and inspected the Crossing recently laid at the east end of the Railway Bridge Slope in Barrack St. and saw Mr Hoey who made a complaint that he cannot as formerly get a cart up to the door of the house, which makes it inconvenient to have manure, &c, brought in or out. We think the Surveyor should remedy this either by lowering the level of the road at the entrance to these houses, or by removing the trap to such site as may seem best to him - the facilities formerly enjoyed by Mr Hoey should not be taken from him.

We also visited Quay St. where a Crossing was recently commenced opposite Mr Connell's. we consider the site most unsuitable as he would not serve more than four houses, having Brown's Row and Roberts row, and other houses unprovided for, as the traffic is almost altogether between these houses and the town end of Quay Street.

We recommend that Crossing be laid opposite Mr Foe's house, so as to serve both of the lanes and all the houses lower down.

Signed - T. F. McGahon,
E. Goodman.

Approved.

Report re approach to Artizans Dwellings - Seatown Ward.

As directed we visited the Pass leading from Seatown to the Council's property in St Peter's Terrace and found the wooden paling broken down at one point, and the Seatown gardens open to trespass - a hole has been made in the boundary wall of the Terrace, which if not attended to may come down - It will be necessary to carry out the recommendation made some time ago, viz- To open out the roadway from Seatown to the Terrace, and build proper boundary walls, to make the required opening it will be necessary to acquire the house and garden occupied by Michael Hearty, and a strip of garden belonging to Mrs Dunne adjoining to same -

Mrs Dunne is willing to give up a portion of garden (about one half) for a compensation of Ten pounds, and that a wall is built along the proposed new road to protect the garden from trespass.

Mr Hearty will give up his house and garden provided there is built on the vacant piece of ground on the West side of the opening a house similar to the Terrace houses, same to be let to him for the rent he at present pays Lord Roden - £2. 0. 0. per year. for the remainder of his life, and the life of his daughter who lives with him.

We consider these terms fair, and recommend them to the immediate acceptance of the Council. Signed - T. F. McGahon. E. Goodman.

Minutes of Meeting of Dundalk Urban District Council
Tuesday 28th March 1911.

Present - Thos F. McGahon VC. Presiding.
C. A. Duffy, John O'Connell, E. Goodman, Peter Hughes, Patk Devy, J. O'Rourke, C. J. McGahon & Thos Gosling.

Minutes of last Meeting read and signed.

1. Minutes of Finance and Sanitary Committee Meeting held on 21st March 1911, read as follows - Present, J. F. McGahon DC in the Chair, B. Hamill JP, E. Goodman, Thomas Gosling, P. Devy, John Callan, Peter Hughes, Chas J. McGahon & Thos O'Rourke.

This Meeting was held to consider the Auditors Report on the Audit of the Accounts to 31st March 1910, also the Demand of the County Council for the ensuing year, and the Poor Rates to be struck in connection therewith.

The question of the Auditors report was first taken up, and the following order was made in connection with same.

1. As to the uncollected carried forward, the Council has been convinced that the rates so carried forward were not collectable within the prescribed period, and the only result of dealing with these cases summarily would be in some cases to impose unnecessary hardships upon the ratepayers, and in others to use the rates altogether by having them returned as irrecoverable. The bulk of the recoverable rates carried forward at March 31st 1910, has since been collected and lodged, and the Council think the course pursued was the best both for the Council and the Ratepayers concerned.

2. As to the Car licenses, the Council came to the conclusion sometime ago that the costs of seeking to enforce the Bye-laws against Outsiders plying for hire, costs which in practice were found to be irrecoverable - exceeded the income derived from Car licenses. The Council however will endeavour again to put the licensing system into operation as recommended by the Auditor.

3. The Town Clerk reports that the arrears of rent on Artizans houses have been got in by instalment payments.

4. The present system of Bi-monthly payments is found to be so very convenient in practice the Council are anxious to continue this system.

Poor Rate 1911-12 The County Council Demand and Estimate of Poor Rate were then considered, and an Estimate of Poor Rate at 3/- in the pound, same as last year, was unanimously recommended.

The question of the Electric lighting was then considered, and Messrs J. F. McGahon, P. Devy, Thos Gosling & B. Hamill were appointed a Committee to go into the Specifications, and if necessary to consult with the Electrical Engineers.

Approved.

Mr O'Rourke referred to a defective Closet in Keogh's premises in River Lane off Park Street, and a waste of Water from the Water-Closet, and the Surveyor stated a Notice had been served in this case, and the Committee that a prosecution be instituted at once.

An application was read from Arthur Mackin - Asst - Water Inspector, for an increase of wages. On the motion of Mr C. J. McGahon, seconded by Mr Thos O'Rourke, it was decided to give him an increase of 3/- per week.

A complaint was made by some of the Tenants in the houses in St Patrick's and St Mary's Terraces as to fowl destroying their gardens - It was recommended, that all the Tenants hereafter be compelled to till their gardens, and cease keeping fowl, except sufficiently caged to prevent damage.

Surveyor's Report read and approved.
Water Inspectors Report read and approved.
Sanitary Reports. Dr Lascey - acting for Dr Sellars, reported as follows -
I have to report as follows on the undermentioned notices received from the S.I. Office. No 225 - House in Park St occupied by Courtney -
There are no sanitary arrangements either inside or outside with the exception of a dry Closet far up in the yard - As this is a Publichouse there should be Sanitary conveniences. The Surface of the yard above the Surface water trap requires to be levelled, as at present some water remains in hollows. A Marine Store is kept in the yard, but there were no objectionable consequences at the time of my visit.
No 226 - I reported on these houses very little over a week ago.
No 227. House occupied by Owen Hoey, Barrack St, I have never visited premises Kept in better order. There is a dry Closet in garden which is a long way from house, which is well Kept, and if always Kept as it was to day is quite sanitary.
House Kept by Jas McCurdy, Barrack St - dry Closet which is not well Kept and yard full of rubbish - Both require cleaning and disinfecting.
House occupied by Wm J. Phillips, W.C out of Order. This should be put right at once as it is a public house. The yard has an earthen surface as in overgrown with weeds.
No 228. House in Barrack St occupied by Anne McArdle - The Surface of the yard is uneven. There are a great number of fowls Kept in the yard which is very dirty. The trap for surface water is out of order. He recommends that fewer fowls be Kept, that yard be cleansed and limewashed, that trap be reset. The remaining houses (six) in this row have dry Closets, uneven Surface on yard, and traps or rather Surface around them, is out of Order. I would recommend the putting in of W.C. also the repairing of traps, and the limewashing of walls. It would also improve the premises, if yards were concreted.
As there are now only four Diphtheria Patients in the Town Hospital - I closed the Point yesterday - I propose having Swabs examined from the throats of these patients before discharging them. There is every reason to hope that the epidemic has come to an end - there having been no fresh cases for more than a fortnight.
Approved - Ordered - That Sanitary Notices be served in any of above cases were necessary - Report dated 15th July 1911.
John D. Hamill S.I. Officer, reported as follows -

There were 59 Ashpit and 6 Ashbins cleansed during the period - Served 13 Notices as to defective Premises in Seatown Ward - No report of any Infectious Diseases for past 3 months.
Approved.
